READ THE NOTICE AND AGREEMENT AT THE TOP.

J.H.C.

Mint of the United States at Philadelphia, Pa.,

SUPERINTENDENT'S OFFICE,

June, 1888

Sir:

I have had the accounts of the Medal Fund for the first three quarters of the current fiscal year amended to conform to your suggestions and both sets of papers are herewith enclosed.

In reference to the gain on silver I have to say that it is an indeterminate quantity which represents the difference between the weight of standard silver dollars given to the coiner in payment for silver medals

2)

and the same amount of half dollars which are regarded by him as the standard of weight. If the payment were always made in silver dollars and the full amount were tendered the gain would show about one dollar on every fifteen. Sometimes however the excess, or the greater part of it, is subtracted first and a portion of the payment is made in halves and quarters, in which case the gain is somewhat less than the proportion of one to fifteen.

Very Respectfully

Hon. Jas. P. Kimball
Director of the Mint
Washington D.C.

Superintendent

Mint of the United States at Philadelphia, Pa.,

SUPERINTENDENT'S OFFICE,

August 16 1888

Sir:

The package returned by you through the Adams Express Company came to hand all right.

There are not enough silver proof sets on hand to fill your order but a new lot will be ready probably by tomorrow when your order will be promptly filled.

As you say that you have nothing to recall in reference to your insinuations regarding the Medal Clerk I can only reply that you thus adhere to a false and I presume malicious assertion that should have led us to have this

place for ~~such~~ this motto, is found in connection with the national inscription which on all our larger coins is on the reverse — the device of which is an eagle with the head dis accompanying appropriate to the arms of the Union as adopted by law, ~~distinc~~ sing at present with the motto (E Pluribus Unus) and the crest Especially the double Eagle: The place of the crest offers the best position for ~~inserting~~ inserting the motto proposed to, as on all the other coins which are large enough to admit of such an addition: this space is now vacant, — and a motto of sufficiently brief, with the least disturbance of the device as now arranged. ~~It is clear~~ ~~and the question whether the motto God our Trust, endeared from its use in the "Star Spangled Banner" is exactly~~ The adoption on our coin of the motto "God our trust" or some other words to the effect of our national reliance upon divine support would accord fully with the sentiment of the American people and ~~as~~ if issued ~~position~~ would add ~~instead of detract from their~~ to the artistic appearance of the coins ~~proposed~~ it may be doubted whether any change in the present design are necessary.

the remainder ~~which would be some thing~~, would pay expenses of recoinage & transportation. The three cent pieces already out, and considerably worn, might be left to fulfil their mission, without calling them in, or adding to their number; the cents being sufficient to fill the space between one cent & five. It would be best ~~perhaps~~ at present, to limit the new issue to the dime, & half dime, having the larger coins for future consideration, or probably, to return to their par value, on the return of better times.

The distinct & unequivocal recognition of the Sovereignty of God, in the practical administration of our political system, is a duty of the highest obligation. History, unites with divine revelation in declaring that "happy is that people whose God is the Lord" In the exercise of political Sovereignty our Nation should honor Him; and now, in this the hour of peril and danger to our country and its liberties, it is becoming to acknowledge his power and invoke his protection. Our National Coinage in its devices & legends should indicate the Christian character of our Nation & declare our trust in God. It does not do this; On the contrary, Mythology, more than Christianity, has stamped its impress on our National Coins. It is however gratifying to know that the proposition to introduce a motto upon our Coins, expressing a National allegiance or Divine support has been favorably considered by ~~the proper authorities~~ your department, and will, no doubt, be approved by an intelligent public sentiment. The subject is under the control of Congress; and without a change in existing laws, no alteration in the legends & devices of most of our National Coins can be made; a motto may be added without additional authority, or violation of the present law.

# Statement of Foreign Coins.

This statement, as required by law, will be found ~~ed~~ appended to the Report. The additions are ~~but~~ few, but ~~there~~ are alterations in the silver, occasioned by the raising of the ~~bright~~ price. In gold, we find the Sovereign of the mint of Sydney, Australia, by the trial of a much larger lot than has been hitherto procurable, a little higher in average weight, and a little lower in average fineness, than reported last year. It may be well to state here, that an inquiry has been raised in England as to the propriety of making Australian coin pass every where, concurrently with the British sovereign; being in fact of equal value, though quite different in devices, and in color. We have not seen the printed documents on this subject, but as the coinage of the Sydney mint is large, it is worth while to bring the matter to public notice.

There are also several varieties of private coinage at Pike's Peak, Colorado Territory, which not being foreign, nor legal, cannot claim a place in the table; and yet, being issued in considerable amounts, and current in the far West, ought ~~not~~ to receive attention. They are all of a pale color, and more highly alloyed than our lawful coinage; making up in some cases by increase of weight. Thus we have, the ten-dollar piece of Clark

Gruber & Co., ranging from 768 to 832 thousandths fine, and of course as various in weight; but they all appear to be about ten dollars in value (a few cents more or less) by computing ~~charging for~~ the value of the silver contained, and charging for the parting. — The ten-dollar piece of J. J. Conway & Co., is only 830 thousandths fine by a single trial, being largely alloyed with the silver naturally present. The net value of gold and silver is $7.25. — The five-dollar piece of John Parson & Co., by a single trial is 751 fine, and its net value $4.20. — The trials in these latter cases are not sufficient for a fair average valuation, but they will give an idea as to the deficiency.

In silver we have added, from a recent assay, the Maria-Theresa thaler of Austria, which is coined specially for the Levant trade, but always bears the date 1780, no matter when struck. We have lately had a good opportunity to make an average of old and new pieces, many being of the latter sort. They fully maintain their original standards, and in fact are a little better than we reported them twenty years ago.

In January of the present year, the mint price of silver was raised from 121 to 122½ cents per ~~standard~~ ounce troy, of standard fineness. This requires an entire change in the column

of values of silver coins. & the change has accordingly been made.
